

Before

After

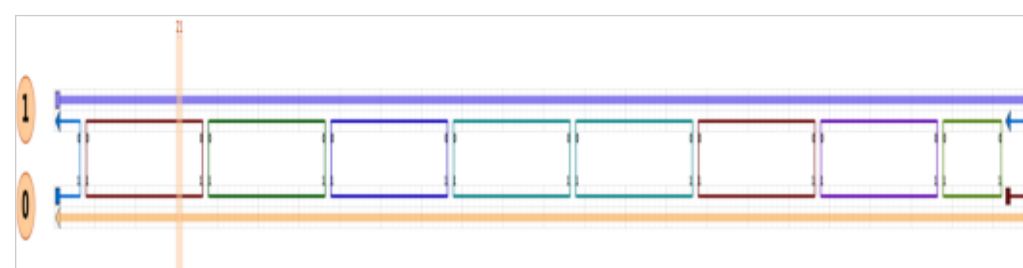

*Split the staple strand on helix 0
at position 42*

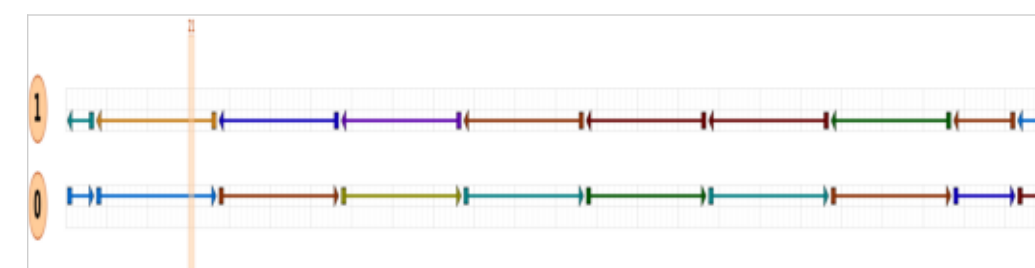

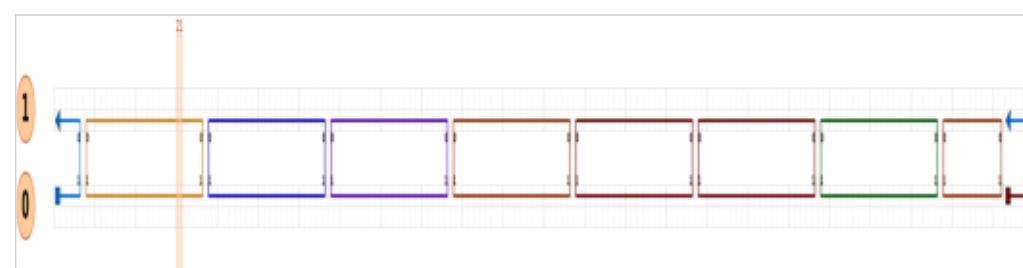

*Automatically break all staple
strands into optimal lengths*

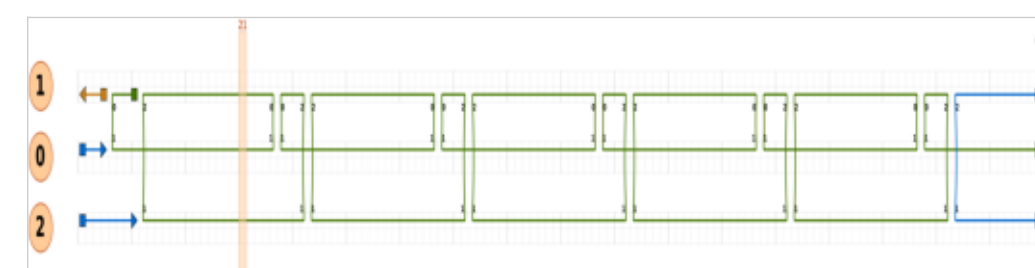

*Add staple crossovers between helix
0 and helix 1*

*Remove all scaffold crossovers
between helix 0 and helix 1*

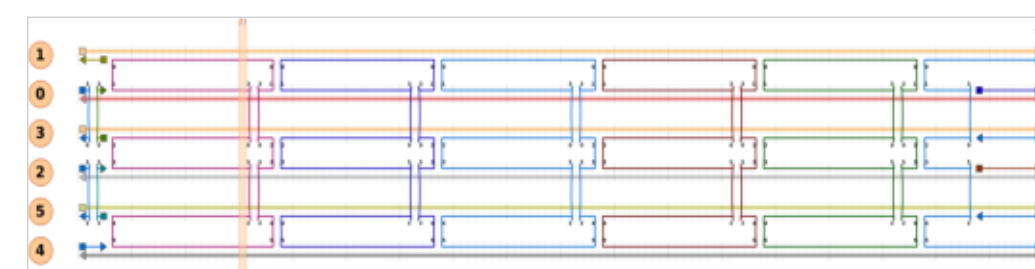

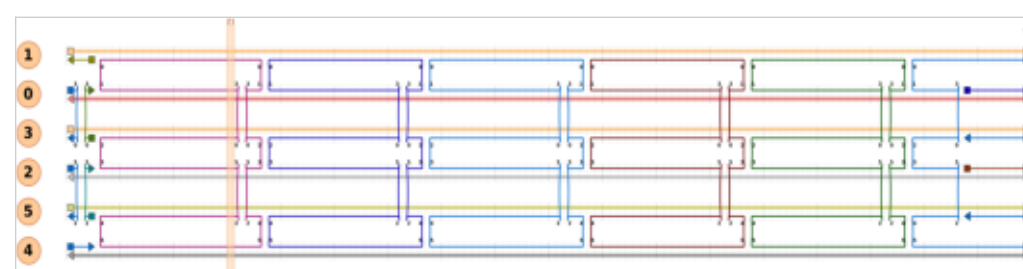

*Add scaffold crossovers between all
neighboring helices in a 3-helix
design*

*Add both scaffold and staple
crossovers to all neighboring
helices in a 6-helix design*

*Move the crossover at helix 2 index
44 right by 3 bases in a 6-helix
design*

*Automatically break all staple
strands into optimal lengths in a
6-helix design*
